SUMMARY

Fresh graduate with over 2 years of hands-on web development experience across React.js, Node.js, Flask, and both relational and NoSQL databases, plus 5 months of experience as a IBM Maximo Developer customizing enterprise workflows and UI configurations. I can independently build and ship full-stack features, writing clean code and collaborating in Agile, Git-based team environments.

EXPERIENCE

Soldier — Compulsory Military Service, Cairo, Egypt

Apr 2025 – Jun 2026

Software Engineer — MegaSoft IT Consulting & Training, Cairo, Egypt

Sept 2024 – Jan 2025

- Customized IBM Maximo workflows and UI configurations to meet client requirements, working closely with stakeholders to translate business needs into interface changes.
- Developed automation scripts and escalation rules in IBM Db2 to streamline database management and improve operational efficiency.

IT Intern — National Bank of Egypt, Cairo, Egypt

Aug 2023 – Sept 2023

- Wrote SQL queries and automated reports in Oracle DB to speed up data analysis for internal banking operations.

EDUCATION

B.Sc. Computer Science & Artificial Intelligence — Helwan University, Cairo, Egypt

Sept 2020 – May 2024

- Graduated with a CGPA of 3.94/4.00, ranked 8th in the class, specializing in software engineering.

CERTIFICATIONS

SQL — 365 Data Science

Nov 2025

ITIL V4 FOUNDATION — Megasoft

Nov 2024

Full-Stack Web Development using Python — Information Technology Institute

Sept 2024

ASP.NET Development — Information Technology Institute

Feb 2023

Frontend Development using React.js — Information Technology Institute

Aug 2022

Web Development using PHP — Information Technology Institute

Jul 2022

TECHNICAL SKILLS

- Programming Languages: JavaScript, Python
- Front-End: React.js, Redux, Bootstrap, SASS, HTML5, CSS3
- Back-End & APIs: Node.js, Express.js, Flask, REST & GraphQL APIs, JWT authentication, Firebase
- Databases: MongoDB, PostgreSQL, IBM Db2
- Data & ML: NumPy, Pandas, Matplotlib, TensorFlow
- Tools & Practices: Git, GitHub, Postman, Vercel, Linux, IBM Maximo
- Languages: Arabic (Native), English (C1 Advanced), French (A2)

PROJECTS

HuBMAP — Microvasculature Segmentation (Graduation Project) — Python, Flask, React.js, TensorFlow

Backend: <https://github.com/AhmedMaherElSaeidi/HuPMap-Segmentation-Flask>

Frontend: <https://github.com/AhmedMaherElSaeidi/HuPMap-Segmentation-ReactJS>

- I built a UNet model to segment microvascular structures in kidney tissue images, handling preprocessing, and hyperparameter tuning. I evaluated its performance using IOU and Dice scores to ensure accurate segmentation results.
- I built a full-stack application with a Flask backend serving four deep-learning models (UNet, Custom UNet, LinkNet, and FCN) that segment microvascular structures in kidney tissue images, and a React frontend where users upload an image with its ground-truth mask and receive six comparison images plus IOU/Dice confidence scores from their chosen model.

TastyBite — Online Food Ordering App — React, Vite, Node.js, Express, MongoDB

Frontend: <https://github.com/AhmedMaherElSaeidi/TastyBite-reactjs>

Backend: <https://github.com/AhmedMaherElSaeidi/TastyBite-nodejs>

Live: <https://tasty-bite-reactjs.vercel.app>

- I designed and built TastyBite a bilingual (EN/AR) React front end with full RTL support, menu browsing, a cart, and checkout, backed by a Node.js/Express/MongoDB API I built with JWT authentication, Cloudinary-based image uploads, and order-status workflow.
- I also built the admin side, dashboards for managing products, categories, and order status
